You are filling up everything with
stress meanings.

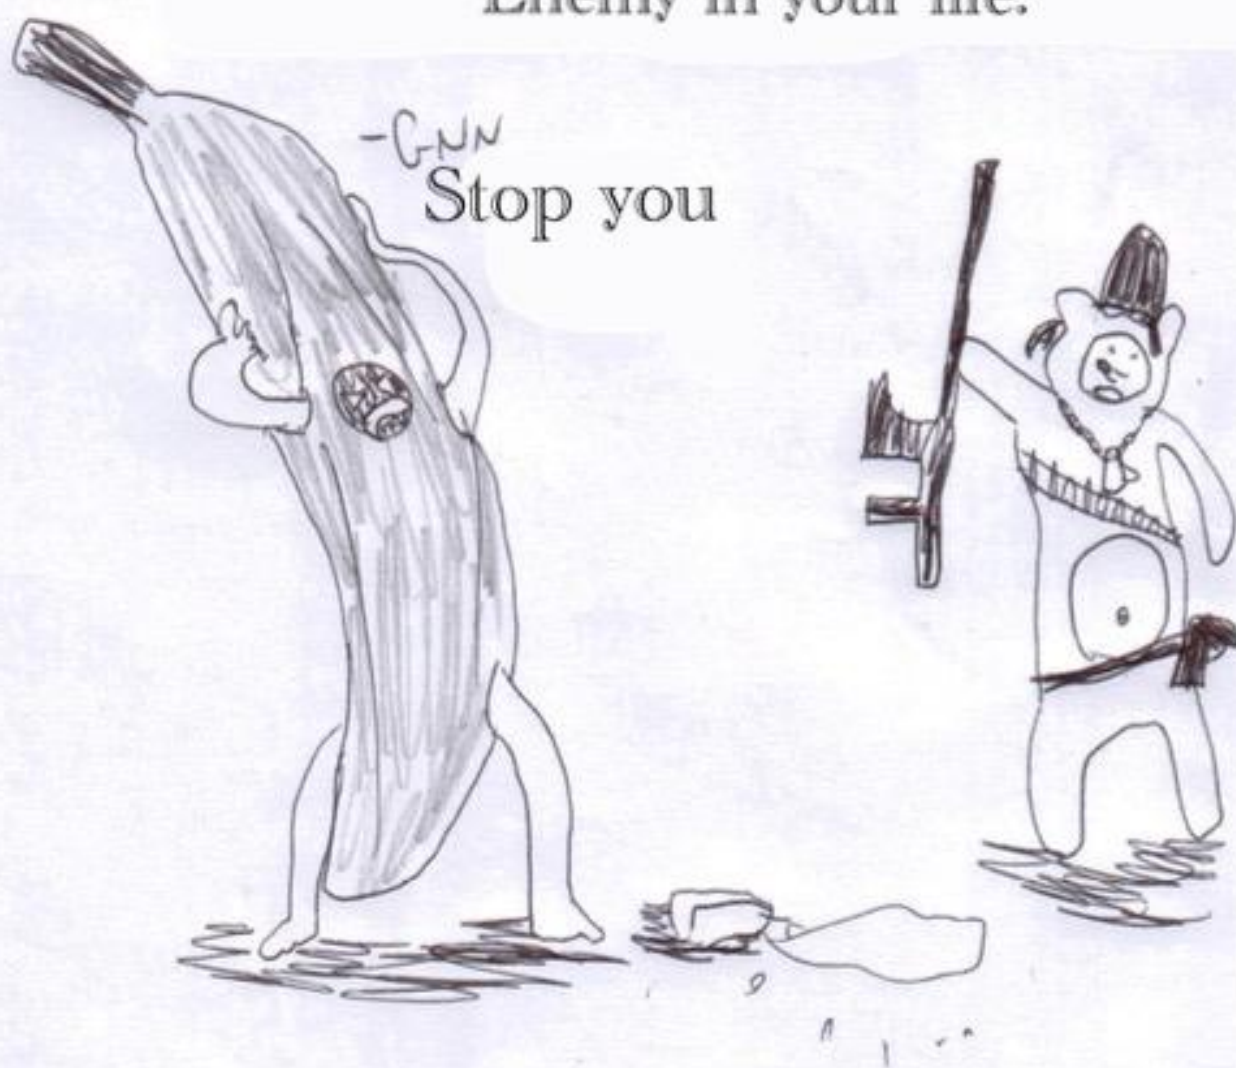

The new modern times is not only stress,
anger and frustration. We evolved for have
pleasure and benefits

How so...?

You are preparing people to a war sense.
Your life is spent as a the soldier ones,
controlling and
Doing things against something. You are
creating your own
Enemy in your life.

The benefits are wishes and the rest is done
for your health. Your work is like your
enemy and what you suggest is psychological
solutions to accept all of them.

The religion is now a
mystery and souls is
empty and
available only
in psychological
meaning,
paying or for free, you are
ever a product
and nothing more if not to
accelerate the progress to a
uniformed society.

Of yourself is
Meaningless
Because they
Know you

Without a soul research your life is a waste
of time, your work is slavery and your
passions are your sickness. Ask yourself this:
why should you care of find yourself if
Whatever you do is done by you? Is this a
way to accept
All the evilness?

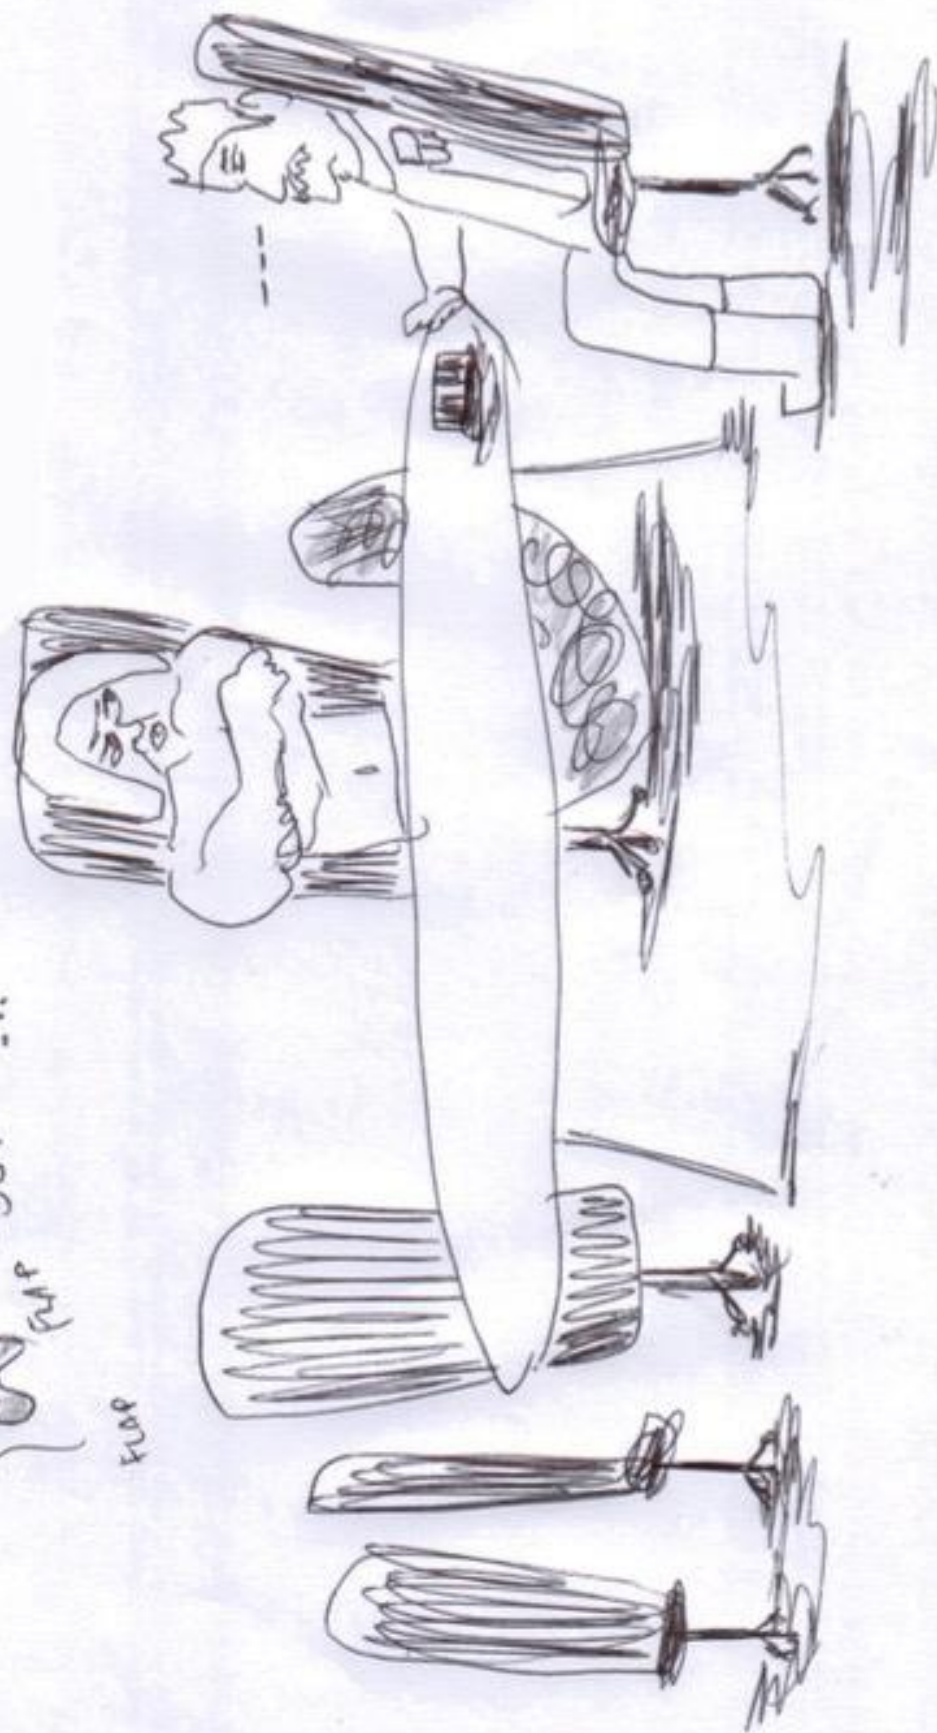

You were saved by God
But what from me?

The plan failed.
